# WHO ARE PROTECTOR? WHY PROTECTOR ?

Protector RIBs are highly regarded globally for their versatility, durability, and customisability, making them an excellent choice for commercial organisations such as coastguards, police, customs services, and professional race teams. Key reasons why Protector RIBs stand out:

## Proven Performance and Reliability

Protector RIBs are designed and built to handle demanding operational environments, ensuring reliability in critical missions. They are trusted by elite organizations worldwide for their consistent performance in challenging conditions.

## Fully Customisable Design

Protector RIBs can be tailored to meet specific operational requirements. Whether it's for search and rescue, law enforcement, or high-speed racing, the boats can be customized with specialised equipment, seating arrangements, and technology to suit the mission.

## Advanced Hull Design

The RIBs feature advanced hull designs that provide exceptional stability, speed, and manoeuvrability allowing crews to remain operational even in the most extreme conditions. This makes them ideal for high-speed pursuits, rough seas, and precision operations.

## Durability and Safety

Constructed with high-quality materials, Protector RIBs are built to withstand harsh marine environments. Their robust design ensures safety and longevity, even in extreme conditions.

## Global Support Network

Protector has a worldwide network of dealers and service centres, ensuring that customers receive timely support, maintenance, and spare parts wherever they operate.

## Versatility for Multiple Roles

Protector RIBs are versatile and can be adapted for a wide range of roles, including:

### Coastguard:

Search and rescue, surveillance, and interdiction.

### Police:

Patrol, pursuit, and tactical operations.

### Customs:

Border security, anti-smuggling, and inspection.

Professional Race Teams: High-speed performance and reliability for competitive racing.

## Compliance with International Standards

Protector RIBs are designed to meet or exceed international safety and performance standards. The Targa model is Coded to : Build Category B & Area of Operation Cat 2: Up to 60 miles from a safe haven.

## Proven Track Record

With a long history of successful deployments, Protector RIBs have earned a reputation for excellence in both commercial and law enforcement applications.

## Commitment to Quality

Protector is committed to delivering high-quality RIBs that meet the exacting standards of professional users. Their attention to detail and focus on customer satisfaction set them apart in the industry.

## Conclusion:

Protector RIBs are the go-to choice for organizations that demand high-performance, customisable, and reliable marine solutions. Their ability to adapt to diverse operational needs, combined with their proven track record, makes them a trusted partner for coastguards, police, customs services, and professional race teams worldwide. Whether it's for safety, speed, or precision, Protector RIBs deliver exceptional results.

## CUSTOMISATION & FITOUT

Protector RIBs are designed with flexibility in mind, allowing commercial clients to tailor the vessel to their exact operational needs.

From engine options to seating arrangements, electronics, and mission-specific equipment, Protector RIBs can be customised to ensure optimal performance, safety, and efficiency in any operational environment. This level of customisation ensures that each RIB is perfectly suited to the unique requirements of its intended mission.

Protector RIBs offer a range of customization options to ensure the boat performs optimally for its intended use.

# ENGINE OPTIONS

**Power and Performance:**  
Clients can choose from a variety of engine options to suit their performance requirements, including horsepower, speed, and fuel efficiency.

**Engine Brands:**  
Protector RIBs can be fitted with engines from leading manufacturers such as Mercury, Yamaha, Honda for Petrol options & COX or OXE for Diesel OBM options. Inboard engine brands Volvo Penta, Cummins, Mercury.

**Number of Engines:**  
Depending on the size and purpose of the RIB, clients can opt for single, twin, or even triple engine configurations.

# SEATING OPTIONS AND LAYOUT

**Crew and Passenger Seating:**  
Customisable seating arrangements can be designed to accommodate the specific number of crew and passengers, ensuring comfort and safety.

**Ergonomic Design:**  
Seats can be tailored for ergonomic support, especially for long-duration missions.

Shock Mitigation Seats are designed to reduce the impact of shocks and vibrations on the crew and passengers, enhancing comfort, safety, and operational effectiveness reduces fatigue and improves focus during long missions.

**Modular Layouts:**  
The interior layout can be customized to include storage compartments, workstations, or additional seating as needed, modular designs allow for easy installation, removal, or reconfiguration as needed.

**Mission-Specific Equipment**  
**Search and Rescue (SAR):**  
For SAR operations, Protector RIBs can be equipped with stretcher mounts, medical equipment storage, and additional lighting.

**Law Enforcement:**  
Protector RIBs can be fitted with weapon mounts, suspect transport seating, and evidence storage.

**Military Applications:**  
Military clients can customize RIBs with ballistic protection, and specialized mission equipment.

Protector Boats can also be fitted for **Weapon Systems Integration:** For military or law enforcement RIBs, including remote-controlled weapon stations or mounts.

**Environmental Sensors:**  
For scientific or research missions, such as water temperature, salinity, or depth sensors.

**Fish Finders:**  
For professional fishing charter vessels, providing real-time data on fish location

# ELECTRONICS

Protector RIBs are highly versatile platforms that can be fitted with a comprehensive suite of electronic equipment to meet the demands of any mission. From navigation and communication to surveillance and safety systems, these boats can be customised to ensure optimal performance and operational readiness. Whether for military, law enforcement, or commercial use, Protector RIBs equipped with advanced electronics are capable of handling the most challenging environments and tasks, With User-Friendly Interfaces: Systems are designed for ease of use, even in high-stress situations.

## CREW WELFARE

Protector RIBs can be equipped with a wide range of crew welfare features, transforming them into versatile platforms capable of supporting extended missions in comfort and safety. From basic sanitation and climate control to sleeping bunks and compact galleys with refrigeration and cooking facilities, these customisations ensure that crew members remain in peak condition, ready to tackle any operational challenge. Whether for military, commercial, or humanitarian missions, Protector RIBs can be tailored to meet the unique needs of their operators. Welfare equipment is designed to fit seamlessly into the RIB's layout without compromising performance or safety and systems are integrated with the boat's power supply, with options for backup generators or solar panels if needed.

## DESIGN PROCESS

The Rayglass, PB Europe, and Ancasta Yacht Services (AYS) teams bring unparalleled expertise and experience to the design, build, and customization of Protector RIBs. Their deep understanding of commercial, law enforcement, and military operations allows them to provide clients with practical, innovative, and tailored solutions that meet their specific needs. By leveraging their experience and working closely with clients, they ensure that every RIB is built to the highest standards of performance, safety, and reliability. Whether for commercial, law enforcement, or military use, clients can trust these teams to deliver a RIB that exceeds expectations.

# BENEFITS OF WORKING WITH TAILORED SOLUTIONS

Every aspect of the RIB is designed to meet the client’s specific operational requirements. The expert collaboration and combined expertise of Rayglass (boat building) and Ancasta Yacht Services (AYS) ensures a high-quality, functional, and reliable vessel. With clients being involved at every stage, from concept to delivery, ensuring a transparent process and complete satisfaction. Examples of existing solutions and successful builds and provide confidence in the team’s ability to deliver.

By using a well proven and successful design process combined with ensures that every aspect of the boat is tailored to the client’s specific needs, from initial concept to final delivery.

## INITIAL CONSULTATION AND REQUIREMENTS GATHERING

**Client Input:** The process begins with the client providing detailed specifications and operational requirements. This includes mission profiles, performance expectations, crew size, equipment needs, and any special features required.

**Operational Analysis:** The teams from Rayglass and Ancasta Yacht Services (AYS) work closely with the client to understand the intended use of the RIB, whether for military, law enforcement, search and rescue (SAR), commercial, or other specialized tasks.

## CONCEPT DEVELOPMENT

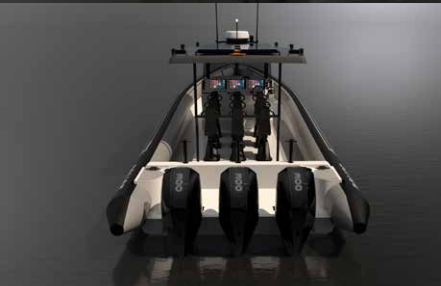

Custom Design: Based on the client's requirements, the teams create a full concept presentation that includes:

Renders: High-quality 3D visualizations of the proposed RIB design.

Drawings: Detailed technical drawings and plans.

Images of Existing Solutions: Examples of similar builds or features to help the client visualize the final product.

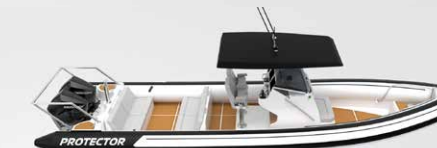

Collaborative Review: The client reviews the concept presentation and provides feedback, ensuring the design aligns with their operational needs and expectations.

## DESIGN REFINEMENT

Iterative Process: The teams refine the design based on client feedback, making adjustments to layout, equipment, and features as needed. Technical Specifications: Final technical specifications are agreed upon, including hull design, engine configuration, electronics, and welfare features.

# TESTING AND DELIVERY

Sea Trials: The completed RIB undergoes rigorous sea trials to ensure it meets performance and safety standards. Client Training: If required, the client's crew can receive training on the operation and maintenance of the RIB.

Final Delivery: The RIB is delivered to the client, ready for operational deployment.

## WARRANTY & AFTER SALES SUPPORT

The Protector RIBs warranty is a testament to the brand's commitment to reliability and customer satisfaction, offering global support through a network of Protector Distributors, Dealers, and Partners. This worldwide infrastructure ensures that any after-sales issues are addressed with speed and efficiency, minimizing operational downtime and keeping you on the water maintaining operational capability.
